SUBJECT INDEX

Adsorption calorimetry in surface chemistry, 19
Adsorption effects during TPD from porous materials, 147
Adsorption of D_2O by sepiolite and palygorskite, 291
Adsorption of rhodamine 6G by smectite minerals, 299
Ag, Al, Au, specific heat data, metals, Schottky type defects, 179
Al_2O_3, porous materials, diffusion and readsorption effects during TPD, 147
Albite, kinetic analysis of monochromatic TL curves, 103
AlOH polymer/montmorillonite/humic acid complexes, thermal analysis, 307
Ankerite-dolomite mineral series, DSC study in variable atmospheres, 225
Aqueous solutions of $MgCl_2$, $SrCl_2$, $BaCl_2$ and $ZnCl_2$–calcite equilibration, thermal analysis, 237
Aragonite, thermoluminescence, 213
Bentonite suspensions, feldspar formation during storage, drying and/or heating, 319
Binders, clays in moulding sands, DTA, 341
Biological tissue, laser irradiation, 167
Biomembranes, fluctuations, stability and fusion, 161
Brick clay, evolved gas analysis, 207
Brucite marble, evolved gas analysis, 207
CaF_2:Tm (TLD-300) TL dosimeters, kinetic parameters, 111
Calcite equilibrated with aqueous solutions of $MgCl_2$, $SrCl_2$, $BaCl_2$ and $ZnCl_2$, 237
Calcite, thermoluminescence, 213
Calcitic and dolomitic marl, mineralogical changes upon heating, 243
Calcium carbonate, solid state decomposition reactions, kinetics, 37
Calcium oxalate, thermal decomposition of solids, kinetics, 79
Calculation of kinetic parameters from thermogravimetric data, 187
Calorimetry and thermal analysis, interplay, 31
Calorimetry, adsorption, in surface chemistry, 19
Camphor, interplay of calorimetry and thermal analysis, 31
Carbonates, 213, 219, 225, 231, 237, 243, 253
Carbonation of ettringite by atmospheric carbon dioxide, 347
$CaSO_4$:Dy + PTFE thermoluminescent dosimeter, glow curve kinetics, 121
Catalysts, multiphase, adsorption calorimetry, 19
Ceramics, determination of quartz by dilatometry, 335
Chabazite tuff, thermal activation, solar energy storage, 379
Clay minerals, 279, 285, 291, 299, 307, 313, 319
Combustion gases measured with a tubular reactor/TG combination, 139
Conformational disorder, detection by thermal analysis, 8
Conversion, nonisothermal kinetic equations, 193
Copper oxides, superconductors, synthesis and thermal properties, 5
Cu, specific heat data, metals, Schottky type defects, 179
D_2O, adsorption by sepiolite and palygorskite, thermal analysis, 291
Decoking kinetics of deactivated zeolite catalysts, 391
Decomposition, heterogeneous, nonisothermal kinetic equations, 193
Decomposition reactions, solids, kinetics, 37, 59, 71, 79
Dehydration and rehydration of expansible clay minerals, 285
Dehydration energy of halloysite, DSC methods, 279
Desulfurization of combustion gases, kinetic investigation, 139
Determination of quartz in ceramics by dilatometry, 335
Dichotomy, decomposition of the solid state, 71
Differential thermometry, 1
Diffusion and readsorption effects during TPD from porous materials, 147
Diffusional barriers, influence on the thermal analysis of the zeolite TON, 359

Dilatometry, determination of quartz in ceramics, 335
Disorder, conformational, detection by thermal analysis, 8
DMPC membrane, properties of domains in heterogeneous systems from thermodynamic functions of solution, 155
Dolomite, thermoluminescence, 213
Dolomite-ankerite mineral series DSC study in variable atmospheres, 225
Dolomitic marl, mineralogical changes upon heating, 243
Domains in heterogeneous systems, thermodynamic functions, 155
Dosimeters, thermoluminscence, CaF_2:Tm (TLD-300), kinetic parameters, 111
Dosimeters, thermoluminscence, glow curve kinetics of $CaSO_4$:Dy+PTFE, 121
Dosimetry, micro, in heavy charged particle induced thermoluminescence dose response, 127
Double decomposition, solids, structure and reactivity, 59
DSC study in variable atmospheres, dolomite-ankerite mineral series, 225
Earth sciences applications of evolved gas analysis, 207
Education for thermal analysis, 11
Emission thermophotometry, 9
Endochronic approach, thermoviscoelastic finite element stress analysis, 199
Ethanol, interplay of calorimetry and thermal analysis, 31
Ethylation of benzene, 391
Ettringite, carbonation by atmospheric carbon dioxide, 347
β-Eucryptite crystallization, kinetics and mechanism, 365
Evolved gas analysis, earth sciences applications, 207
Expansible clay minerals, X-ray studies, 285
Feldspar formation in bentonite suspensions during storage, drying and/or heating, 319
Ferrocene, interplay of calorimetry and thermal analysis, 31
Fluctuations, stability and fusion in biomembranes, 161
Freezing–unfreezing cycles, influence on the thermal behaviour of marine clays, 313
Fusion in biomembranes, 161
Glow curve kinetics of $CaSO_4$:Dy + PTFE thermoluminescent dosimeter, 121
Goyazite, thermal analysis, 259
Grinding, effect on stability and thermal decomposition of siderite, 219
Grinding, effect on the thermal behaviour of tetrapropylammonium occluded in silicate, 403
Grunerite, evolved gas analysis, 207
H_2S adsorption on X and Y zeolites, 371
Halloysite, mineralogy and modes of occurence, 279
Heat conduction, integral equations with superstrong singularity to steady state, 133
Heat flow in biological tissue undergoing laser irradiation, 167
Humic acid/AlOH polymer/montmorillonite complexes, thermal analysis, 307
Hydrophilicity and hydropohobicity of powdered materials, adsorption calorimetry, 19
Hydrotalcite, kinetics of thermal dehydration, 231
Hydroxycarbonates, kinetics of thermal dehydration, 231
Inorganic materials, synthesis and real structure, 3
Kinetic analysis of DTA curves, 97
Kinetic analysis of monochromatic TL curves, 103
Kinetic compensation effect in the thermal decomposition of a solid, 79
Kinetic data, nucleation, DTA curves, 91
Kinetic equations, parameters depending on the degree of conversion, 193
Kinetic investigation of sorbents for desulfurization of combustion gases, 139
Kinetic parameters of CaF_2:Tm (TLD-300) TL dosimeters, 111
Kinetic study of nucleation and growth process by thermal analysis, 85
Kinetics and mechanism of β-eucryptite crystallization, 365
Kinetics of heterogeneous solid state decomposition reactions, 37, 59
Kinetics of thermal dehydration of layered hydroxycarbonates, 231
Kinetics, decoking of deactivated zeolite catalysts, 391
Kinetics, glow curve, $CaSO_4$:Dy + PTFE thermoluminescent dosimeter, 121
Kinetics, homogeneous, decomposition of the solid state, 71
Laponite, adsorption of rhodamine 6G, thermal analysis, 299

Laser irradiation, biological tissue, 167
Layered hydroxycarbonates, kinetics of thermal dehydration, 231
LiF:Mg,Ti,OH, microdosimetry in heavy charged particle induced thermoluminescence dose response, 127
Light emission of thermally stimulated processes, 9
Limestone, solid–gas reactions — sulphation, 253
Lipscombite, thermal analysis, 259
Magnesium chloride, kinetic analysis of DTA curves, 97
Manganite, thermal decomposition, 273
Marine clays, influence of freezing–unfreezing cycles, 313
Materials, characterization by thermal analysis, 11
Mechanical properties of solids, temperature dependent factors, 2
Methylfurane, conversion to methyl thiophene with hydrogen sulphide, 371
Mineralogical changes upon heating calcitic and dolomitic marl, 243
Monochromatic TL curves, kinetic analysis, 103
Montmorillonite, adsorption of rhodamine 6G, thermal analysis, 299
Montmorillonite/AlOH polymer/humic acid complexes, thermal analysis, 307
Moulding sands, DTA, 341
Nonisothermal kinetic parameters, 193
Nucleation and growth process, kinetic study by thermal analysis, 85
Nucleation kinetic data from DTA curves, 91
Oxidation of pyrite, 267
Palygorskite, adsorption of D_2O, thermal analysis study, 291
Particle, charged, induced thermoluminescence dose response, microdosimetry, 127
Phosphates, minerals, thermal analysis, 259
Photoluminescence in carbonates, a new model, 213
Polyesters: phase behavior in binary blends: amorphous, crystalline, liquid crystals, and on transreaction, 7
Polymers, thermal analysis, 10
Porous materials, diffusion and readsorption effects during TPD, 147
Pyrite, oxidation, effect of experimental variables, 267
Quartz in ceramics, determination by dilatometry, 335
Radioluminescence in carbonates, a new model, 213
Reactor, tubular, TG combination, 139
Rhodamine 6G, adsorption by smectite minerals, thermal analysis, 299
Sands, moulding, DTA, 341
Schottky type defects in metals, 179
Sepiolite, adsorption of D_2O, thermal analysis study, 291
Siderite, effect of grinding on stability and thermal decomposition, 219
Siderite, evolved gas analysis, 207
Silica glasses, nucleation kinetic data from DTA curves, 91
Silicalite, the effect of grinding on the thermal behaviour of occluded tetrapropylammonium, 403
Smectite minerals, adsorption of rhodamine 6G, thermal analysis, 299
Smithsonite, thermoluminescence, 213
Solar energy storage by natural zeolites, 379
Solid state decomposition reactions, kinetics, 37, 59, 71, 79
Solid–gas reactions — sulphation of limestone, 253
Solid–gas systems, nonisothermal kinetic equations, 193
Solids, structure and reactivity, 59
Sorbents for desulfurization of combustion gases, kinetic investigation, 139
Specific heat data, metals, Schottky type defects, 179
Stability of biomembranes, 161
Stabilization process of NH_4-NaY, 397
Strengite, thermal analysis, 259
Sulfides, oxidation, effect of experimental variables, 267
Sulphation of limestone, 253
Superconducting mixed copper oxides, synthesis and thermal properties, 5
Surface acidity, modified ZSM-5 zeolites, 385
Surface properties of solids, temperature dependent factors, 2
Tetraalkylammonium silicates gels, precursors to zeolites, 353
Tetrapropylammonium occluded in silicalite, effect of grinding on the thermal behaviour, 403
Thermal activation process of chabazite tuff, 379
Thermal analysis of adsorption of D_2O by sepiolite and palygorskite, 291

Thermal analysis of adsorption of rhodamine 6G by smectite minerals, 299
Thermal analysis of AlOH polymer/montmorillonite/humic acid complexes, 307
Thermal analysis of phosphate minerals, 259
Thermal behaviour of marine clays, influence of freezing–unfreezing cycles, 313
Thermal decomposition of manganite, atmosphere dependence, 273
Thermal decomposition of siderite, influence of grinding, 219
Thermodynamic functions of solutions, domains in heterogeneous systems, 155
Thermoluminscence, 103, 111, 121, 127, 213
Thermoluminescence in carbonates, a new model, 213
Thermoluminescence, induced, dose response, 127
Thermoluminescent curves, kinetic analysis, 103
Thermoluminescent dosimeter, CaF_2:Tm (TLD-300), kinetic parameters, 111
Thermoluminescent dosimeter, glow curve kinetics of $CaSO_4$:Dy+PTFE, 121
Thermometry, early, and differential thermometry, 1
Thermoviscoelastic finite element stress analysis, 199
THF hydrate, interplay of calorimetry and thermal analysis, 31
Tian-Calvet micro calorimeter, 19
TON, zeolite, thermal activation, 359
X and Y zeolites, catalysts for ring transformation, TPD study, 371
X-ray studies, dehydration and rehydration of expansible clay minerals, 285
Y zeolites, catalysts for ring transformation, TPD study, 371
Y zeolites, stabilization, 397
Zeolites, 353, 359, 365, 371, 377, 385, 391, 397, 403
Zeosilites, formation from tetraalkylammonium silicate gels, 353
Zinc oxide, adsorption calorimetry, 19
Zircon, kinetic analysis of monochromatic TL curves, 103
ZSM-5 zeolites, surface acidity before and after heat or steam treatment, 385
